DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 29, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Fiori.

There is disclosed in Fiori a brewing chamber of a coffee machine using a coffee pod 72, the chamber comprising: a top part 30 having openings 76 for the passage of water, the top part being placed on a housing 24; an outer seal 32; and a bottom part 48, wherein the top part is formed as a single monolithic piece of elastic material.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fiori in view of Endo.

Endo discloses the use of concentrically arranged ribs 22 on a top part of a brewing chamber.

It would have been obvious to one skilled in the art to provide the top part of Fiori with the ribs taught in Endo, in order provide a seal between the top part and coffee pod during the entry of hot water.

Claims 33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fiori in view of Bambi.

Bambi discloses the use of a centrally located, flexible bulging element for contacting a filter cartridge in a brewing chamber.

It would have been obvious to one skilled in the art to provide the top part of Fiori with the bulging member taught in Bambi, in order to provide a compression force onto the beverage pod.

Allowable Subject Matter

Claims 19, 20, 28 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21, 22 and 35 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 17, 23-27, 32-34 and 36 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
